

PROACTIVE
FECAL DIVERSION

SAVE
NURSING TIME

ZERO RADIAL
PRESSURE

Automated Stool
Management Kit
saves **174 minutes**
every day

Qoromatic[®]
Automated Stool Management

No inflation No radial pressure No injuries

- Indwelling receptacle exerts zero radial pressure on the rectal mucosa
- Avoid sphincter or rectal damage, and injuries commonly associated with a high-pressure balloon catheter

Proactive fecal diversion

- Automated suction to actively divert and collect fecal exudate before defecation
- Proactive fecal diversion significantly reduces leakage!

Save 7-8 minutes per hour

- FI management takes up to 174 minutes per day. Nurses perform 125 tasks per hour
- Automating FI management can reduce nursing time and fatigue

Quality and Comfort

- Reduce CDI, IAD, HAPI and improve quality metrics
- Complete malodor containment
- No foreign body sensation. Superior patient comfort
